BRITISH AIRWAYS
## How to make a paper plane

A4 Sheet
Printed Side
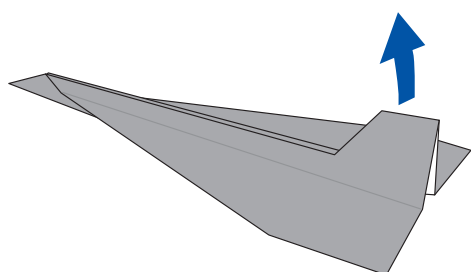

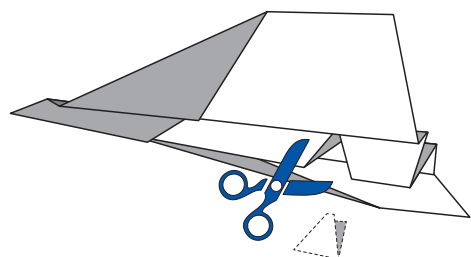

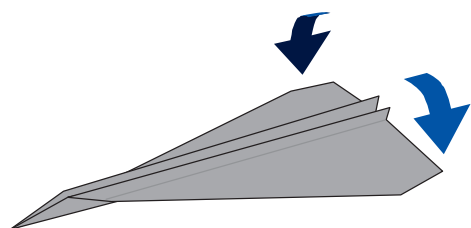

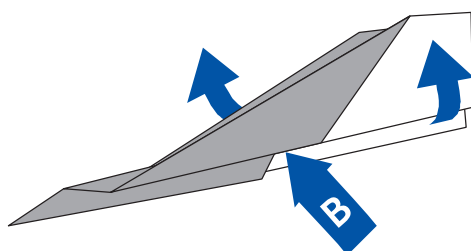

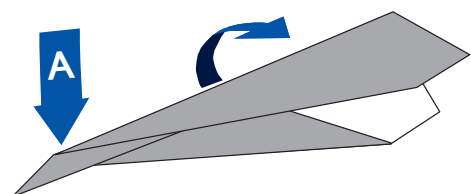

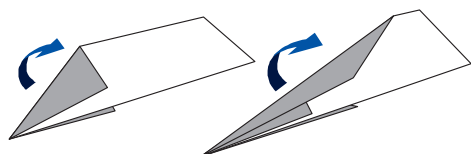

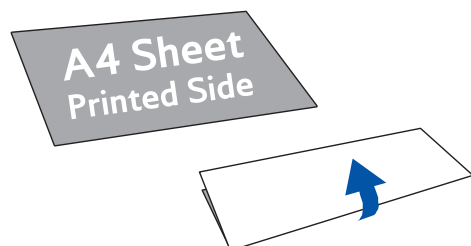

1. Place the paper printed side up on a flat surface

2. Carefully fold in half down the long side

3. Fold both of the corners at the front of the plane down to the centre fold

4. Fold the corners over a second time to the centre fold

A

5. Fold the wings along the blue dashed line

B

6. Fold the wings back on themselves along the red dotted line

7. Pull the wings down to a horizontal position

8. On the underside of the fuselage cut out the marked triangle shape to make the tail fin

9. Pull up the tail so that it sticks out of the top of the plane - you may want to secure the bottom part of the fuselage with a paperclip

10. Throw your plane (but not at each other)

Cut around the blue line to begin...
